HI-RESOLUTION

EBS-2600

HIGH-RESOLUTION INDUSTRIAL INKJET PRINTER

Ideal for printing on porous surfaces

Top printing quality – everytime!

The EBS-2600 is a highly-modern, compact system for high-resolution prints on many surfaces. With its modern, intuitive and reliable design, the printer is ready for operation within seconds. It can be operated via the convenient colour-touchscreen display or remotely via a web browser.

Ecological and efficient!

Up to 510 dots vertically and more than 71mm high, at 180 dpi. Text in every print type and height, raster graphics, geometrical figures, barcodes and 2-dimensional codes can be conveniently created and printed.

Thanks to a highly-efficient printhead, the EBS-2600 can reduce marking costs to a minimum. A maximum power consumption of 15 watts rounds off the picture.

For perfect print intensity and durability, we have developed special oil-based inks. These are characterized by excellent adhesion to a number of surfaces, especially on porous surfaces like pallets, boxes, crates etc. And the ecological aspect is not to be disregarded, as solvent-free and odourless consumables are used.

Our marking systems are already successfully used in the logistics industry, the wood-processing industry and in packaging lines and today replace expensive labellers as well as gas and electric branding irons in the woodworking industry.

→ Printing on cardboard

→ EPAL-certified marking system for pallets

Specifications

Technical Details

Print height	up to 71.8 mm
Maximum speed at 180 dpi	up to 60m/min.
Number of dots per vertical row	510
Internal print memory	4 GB
Ink type	oil-based
External interfaces	Ethernet, USB, RS232 or RS485
Recognition of objects	integrated photocell, external signals
Barcodes	all common 1D and 2D barcodes
Graphics & special characters	monochrome PNG-data, simple geometrical shapes/figures (line, rectangle, ellipsis), character matrix / TrueType®-fonts, support for Unicode UTF-8 diacritical characters
Special registers	date and time in any format (actual or offset), incremental or decremental counter, cascading counter, data from external devices, data from text files
Printer programming	integrated 5.7-inch colour LCD touch panel, remote access via a web browser (platform independent) or with the Offline-Editor - EBS Web User Interface (Windows® only)
User administration	multiple-level access control, administration of user accounts possible
User interface languages	German, English, Polish, Chinese, Czech, French, Italian, Spanish, Turkish, Russian and others
Function output	signal lights output, production stop output
Data base support	MySQL, SQL Server, PostgreSQL and others
Print technology	DOD - drop on demand, Piezo
Power supply & consumption	AC 100-240 V / 50/60 Hz / max. 0.65 – 0.3 A max. 15 W
Relative humidity	10% to 85% without condensation
Ambient temperature	5 - 40°C (can vary with different ink types)
Weight	approx. 4.8kg (without consumables)
Dimensions	210 x 160 x 420 mm

EBS | Innovations since 1977

Plant Nümbrecht - Germany

EBS | 46 Years of Competence and Innovation

Since 1977, EBS GmbH Germany has been a leader in industrial coding equipment. Our early development and pioneering innovations in ink-jet technology are still being used world wide.

Today EBS has become an international producer and operates a family owned multi-national business. We run branch offices and plants in Europe, USA and China and co-operate with numerous partner companies world wide.

More than 360 people develop and produce the range of EBS products in Germany and Poland. We continue to set global standards for quality, innovation, technological leadership and service.

Our high performance products can be found in more than 70 countries, with more than 220 distributors, dealers and OEM's.

We would like to welcome you as our new customer.
